Expertise in compliance, internal investigations and crisis management

Amir Hanna advises national and international clients on compliance, internal investigations and crisis management. His focus is on preventive compliance advice, the development and implementation of customized compliance processes as well as the planning and execution of internal investigations - both on a national and international level. He supports companies in the implementation of regulatory requirements and, in particular, ensures that data protection regulations are integrated in compliance with the law.

Legal project management, AI and legal tech

As an experienced legal project manager, Amir Hanna coordinates complex, cross-border compliance cases and internal investigations. He optimizes the analysis of large amounts of data and ensures efficient management of all project participants in Germany and abroad. He is particularly specialized in the data protection-compliant use of AI-supported eDiscovery tools for the fast and precise investigation of complex issues. In hybrid teams, he develops new best practices for the efficient and reliable implementation of AI processes in eDiscovery. As a certified Nuix Discover end user, he has in-depth expertise in the use of market-leading eDiscovery technologies such as Relativity, Axcelerate and Nuix.
